EDUCATION

University of Virginia, College of Arts and Sciences, Charlottesville, VA ***May 2026***

- B.A. Applied Statistics, Minor in Business | Major GPA: 3.71/4.00

EXPERIENCE

Digital Product & Technology Strategist, **Electric Cow**, Arlington, VA ***September 2023 - Present***

- Developed NeuroDecide, a neuroscience-informed decision-making assessment, building the digital assessment in Qualtrics and supporting the end-to-end product and website.
- Built an R-based data pipeline to clean and process Qualtrics response data, apply assessment scoring and classification logic, and automatically generate individualized client reports.
- Conducted statistical analysis and validation of assessment data in R to evaluate scoring accuracy, response patterns, and reliability of assessment results.
- Automated report generation by integrating R, Excel lookup tables, and Word, transforming assessment outputs across four cognitive dimensions into customized client deliverables.

Education Technology Intern, **mEducation Alliance**, Washington, DC ***August 2025 - December 2025***

- Maintained and organized program data, educational materials, and internal documentation to support cross-functional collaboration and operational accuracy.
- Assisted in developing a data visualization storybook designed to help students in underserved communities learn mathematical concepts through real-world examples.

Technology & Research Intern, **The Culture Company**, Arlington, VA ***June 2024 - August 2025***

- Maintained and analyzed business data using Excel and database tools, improving data accuracy and supporting internal workflows.
- Conducted industry and market research, synthesizing findings to support data-informed business decisions.
- Managed and validated CRM records, customer information, and organizational data to maintain accurate and consistent datasets.

Marketing and Social Media Intern, **P-3 Solutions**, McLean, VA ***July 2023 - October 2023***

- Designed and implemented a comprehensive social media strategy proposal to enhance brand visibility and engagement.
- Developed a content plan incorporating weekly blogs and informational posts tailored to company objectives.

SKILLS

- **Programming:** Python, R, SQL, SAS | Libraries: pandas, NumPy, scikit-learn, ggplot2
- **Analytics & BI:** Tableau, Excel, Shiny, Plotly, Machine Learning, Statistical Modeling, EDA
- **Data & Tools:** ETL, Data Cleaning, Data Validation, SQLite, Git/GitHub, Jupyter Notebook, Qualtrics
- **Languages:** English & Spanish (Bilingual), German (Conversational)

PROJECTS

Business Intelligence Sales Analytics & Forecasting | *Python, SQL, SQLite, pandas*

- Built an end-to-end ETL pipeline to clean and standardize 6,000+ order records, resolving inconsistent dates, product IDs, geographic regions, and categorical values before loading validated data into SQLite.
- Created SQL aggregation views to analyze 2023–2025 sales trends across product families and developed demand forecasts, translating results into visualizations and business recommendations.

Predicting Customer Loyalty with Machine Learning | *Python, R, Machine Learning*

- Analyzed 1M+ retail transactions and engineered customer-level features to predict repeat purchasing behavior while addressing class imbalance, multicollinearity, and data leakage.
- Built and evaluated ridge logistic regression, decision tree, random forest, and neural network models, comparing predictive performance across modeling approaches.

Predicting Respiratory Health Risks Through Air Quality Analytics | *R, Statistical Modeling, Spatial Analysis*

- Integrated air-quality, public-health, geographic, and population datasets to investigate relationships between particulate matter exposure and respiratory emergency department visits across Virginia.
- Performed spatial joins, developed population-weighted exposure measures, and compared Poisson and Negative Binomial regression models to analyze regional respiratory-health patterns.

What Makes a Hit Song? | *R, Shiny, Plotly, Data Visualization*

- Analyzed 25,000+ songs using Spotify, Billboard, and YouTube data to explore relationships between audio characteristics, engagement metrics, and commercial success.
- Built interactive R Shiny dashboards and statistical visualizations allowing users to explore trends in song characteristics, popularity, and engagement.

Math Everyday: Visual Stories of Daily Life | *R, ggplot2, Data Visualization*

- Created a collection of R-based visualizations using real-world data to communicate statistical concepts including proportion, variation, frequency, and temporal patterns through accessible visual storytelling.
